

THE WORLD MANUFACTURING FOUNDATION

- Is an open and independent platform – connecting stakeholders around the globe to discuss the main trends affecting the manufacturing sector.
- It aims to improve manufacturing's role as a dynamic and positive driver of economic equity and sustainable development worldwide.

THE WORLD MANUFACTURING FORUM

- A large-budget, invitation-only, and internationally recognised event created to shape and present the global, regional, and national Manufacturing agendas.
- Supported by our sponsors, the World Manufacturing Forum constitutes the perfect environment where global leaders discuss manufacturing megatrends and challenges.
- The **World Manufacturing Forum 2023** under the theme: “**New Business Models for the Manufacturing of the Future**” is the **11th edition** that the event brings together global policy experts, industry leaders from large multinationals to small-to-medium-sized enterprises, and academic leaders to discuss policy, economic, social, and technical challenges that influence global manufacturing.
