Made - Politecnico Milano

AEIT - Italian Association of Electrical, Electronics, Automation, Information and Communication Technology

POINT - Polo Innovazione Tecnologica

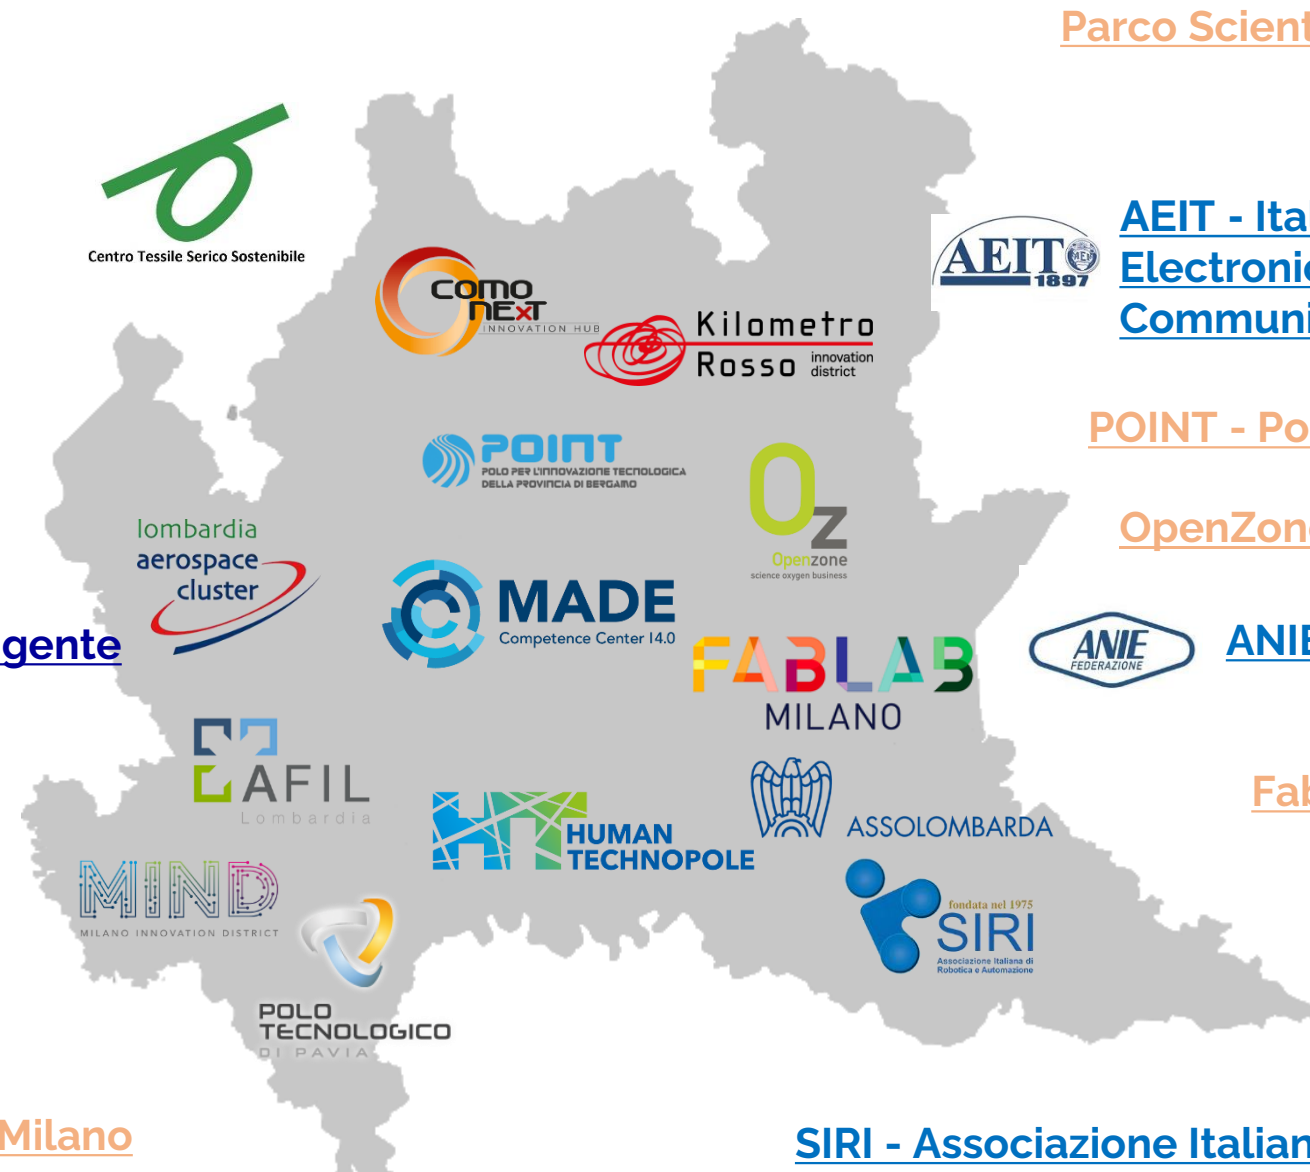

OpenZone

ANIE - Associazione nazionale imprese elettroniche

Fab Lab Milano

Gruppo Meccatronici Assolombarda

SIRI - Associazione Italiana Robotica e Innovazione

BUSINESS ENVIRONMENT

Some recent success stories

tenova

2022

Development of a IoT platform for monitoring the emissions of innovation processes: an IoT data analytics solution, based on Microsoft technologies, to measure the footprint of IT systems, reduce costs, save energy and limit environmental impact.

ABB

2022

In 2020 the Swiss-Swedish company was nominated to be a "Lighthouse Plant", a production plant that is solely based on Industry 4.0 technologies, to favor innovation. In these times, the company is about to make a transition to a 5.0 industry.

Arvedi

2021

Reconversion of the plant in Cremona. The project includes an industrial and environmental redevelopment of the areas, deploying resources up to €227 million.

life.augmented

2021

Creation of a single production pole given by the union of the two production buildings currently in place in the Agrate Brianza (MB) site. Scope of the investment: improve production capacities to better respond to the growing market demand.

FNM

2021

Realization of a sort of Hydrogen Valley in Lombardy. The project (named H2iseO), starting in 2023, is to equip the areas with a fleet of hydrogen trains and related infrastructures.

2021

Participation in the AFIL cluster as part of the "Lighthouse Power Club": a modern electric furnace steel mill that produces special steel. The participating firms have been selected based on the high level of innovation of the development and digitalization projects.
